

C R A Z Y L I F E M E A L P L A N N I N G

WITH FAMILIES EATING AT HOME MORE, LIFE CAN GET CRAZY. A PLACE TO PLAN YOUR MEALS TO MAKE HEALTHY CHOICES FOR YOUR FAMILY.

**THIS
PROJECT
UTILIZES :**

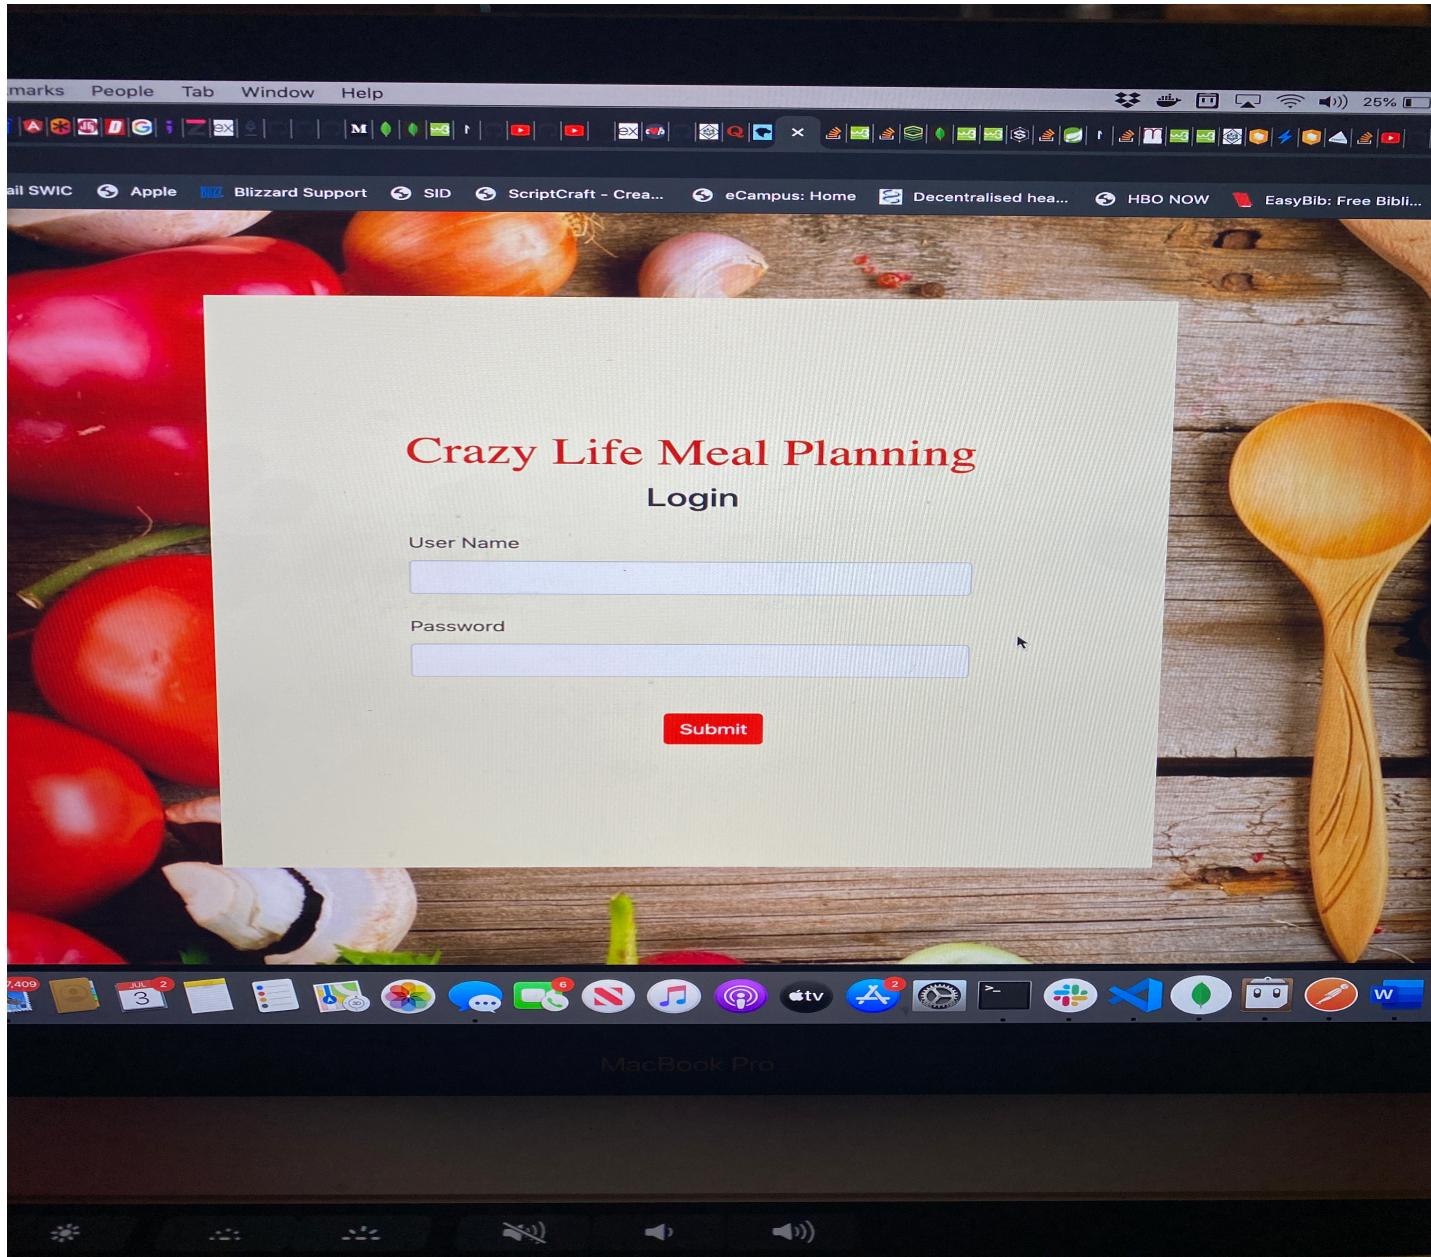

**TYPESCRIPT,
BOOTSTRAP,
ANGULAR,
MONGODB ATLAS,
JAVASCRIPT,
EXPRESS**

Key Features
includes:

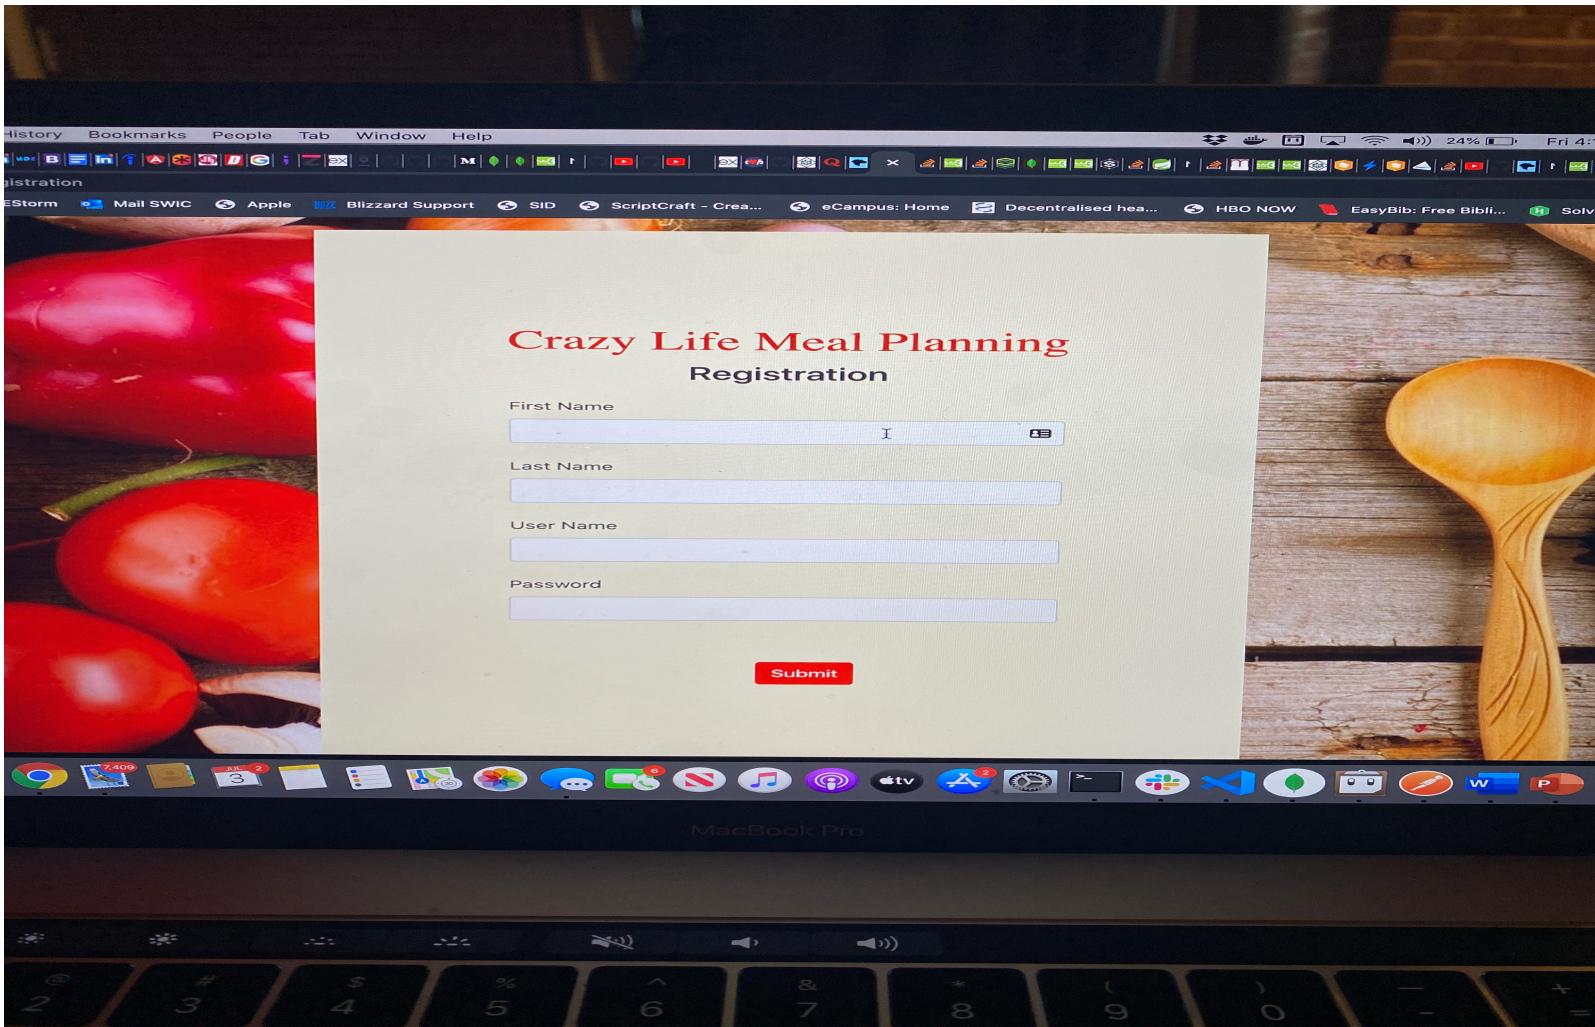

- Login
- Registration
- Adding New Meals
- Click and Drag Planning

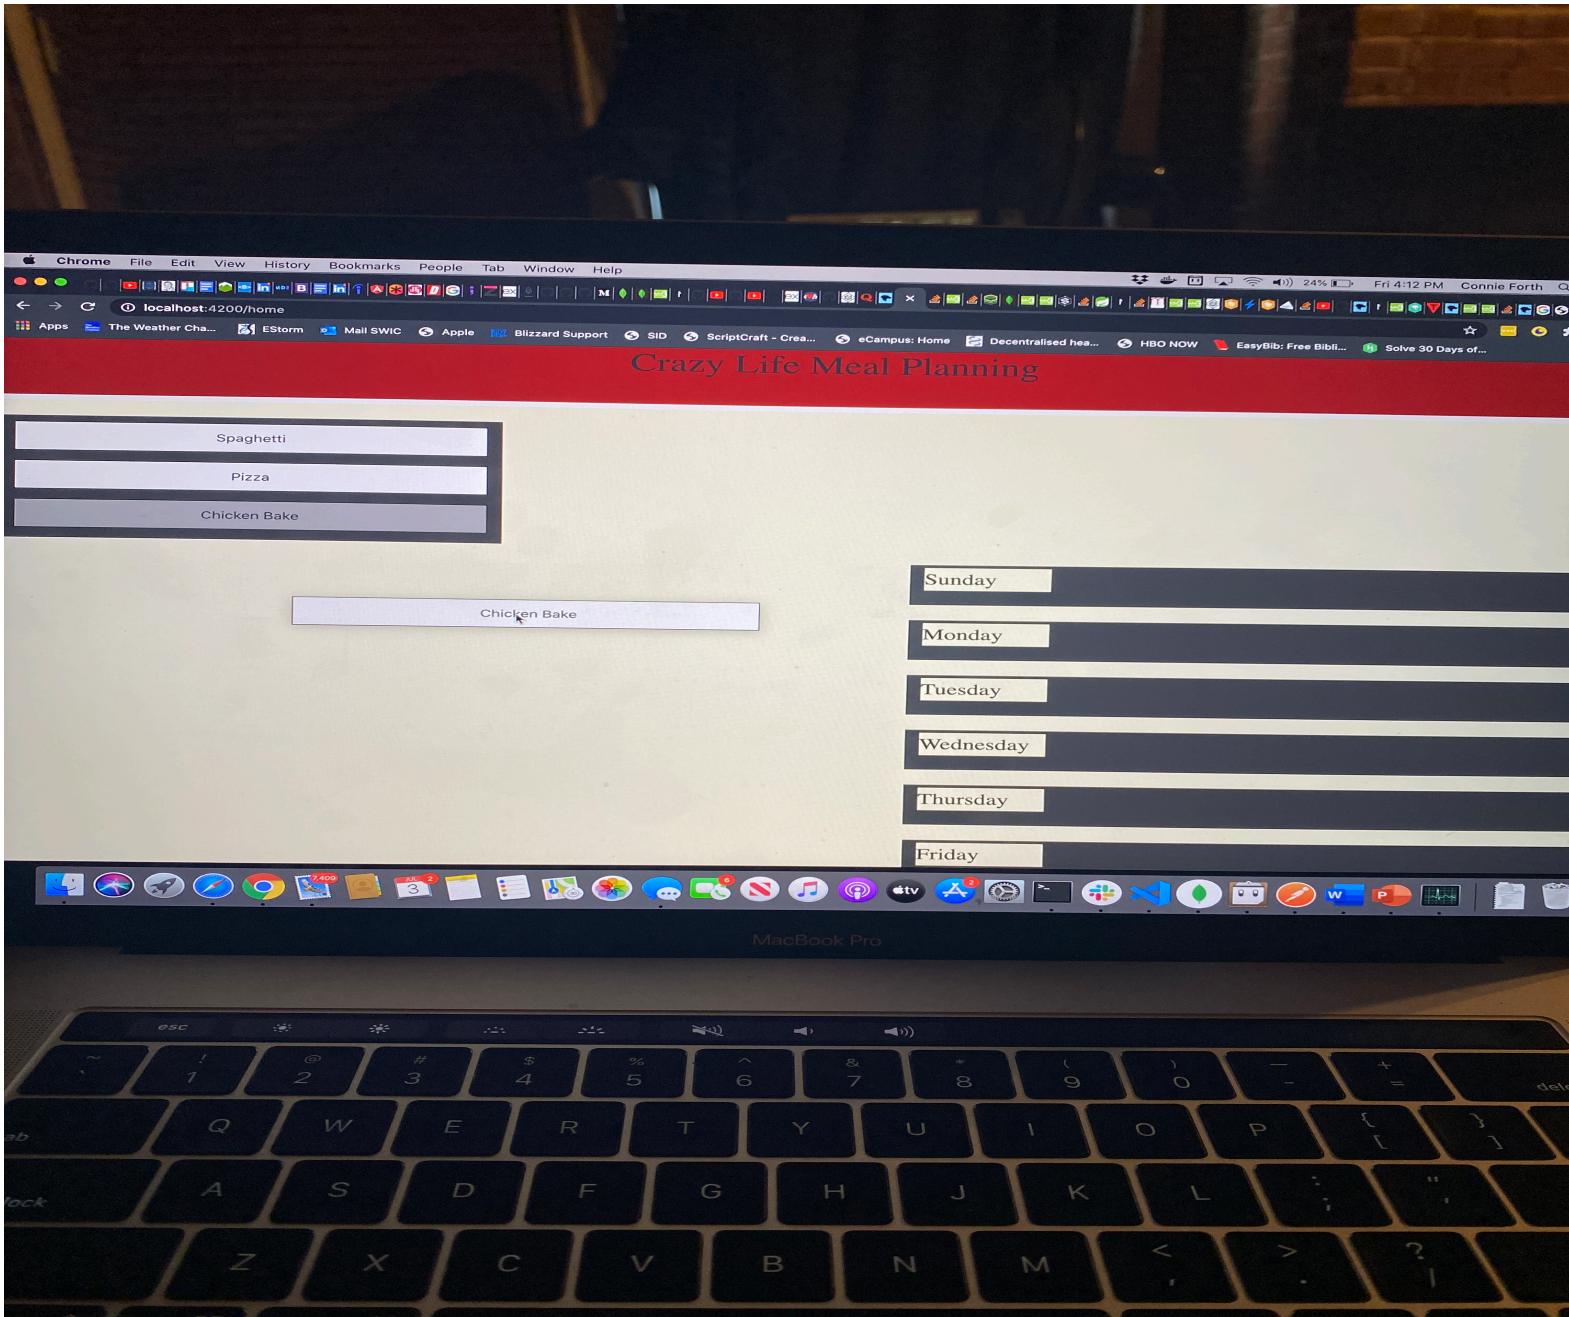

Login page
connected to
MongoDB and
client-side
validation.

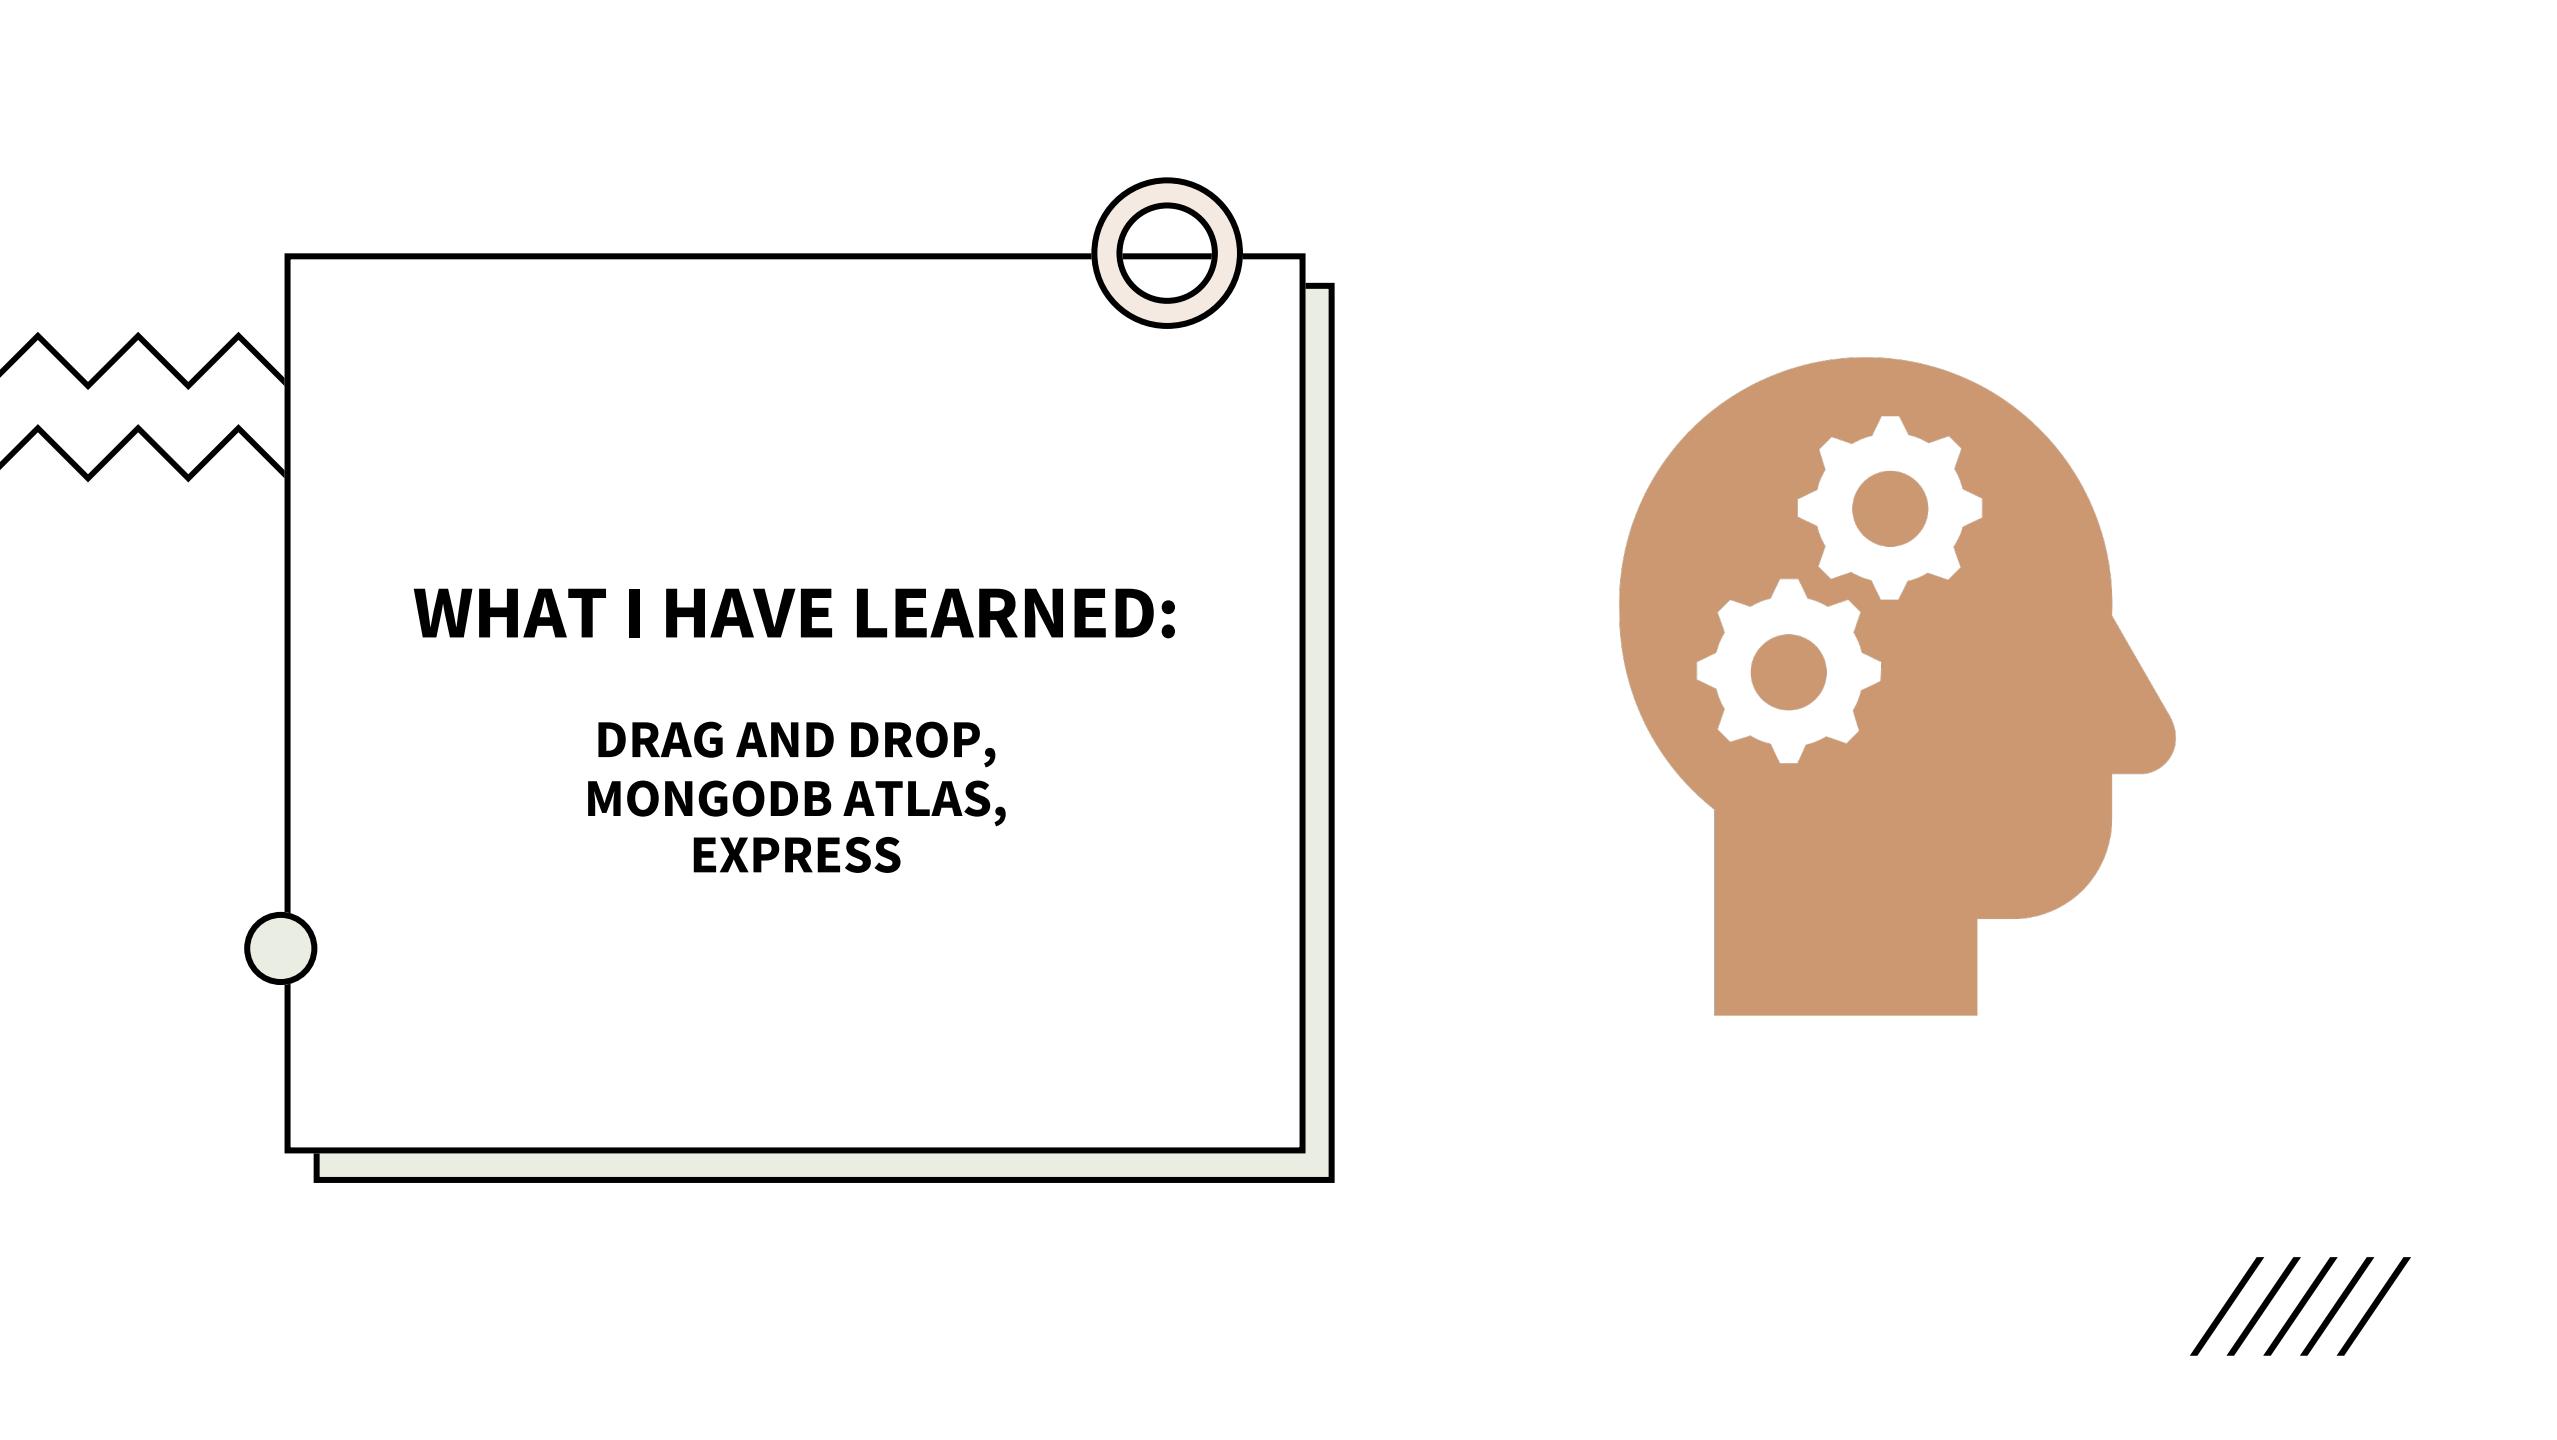

Registration page with connection to MongoDB and has client-side validation.

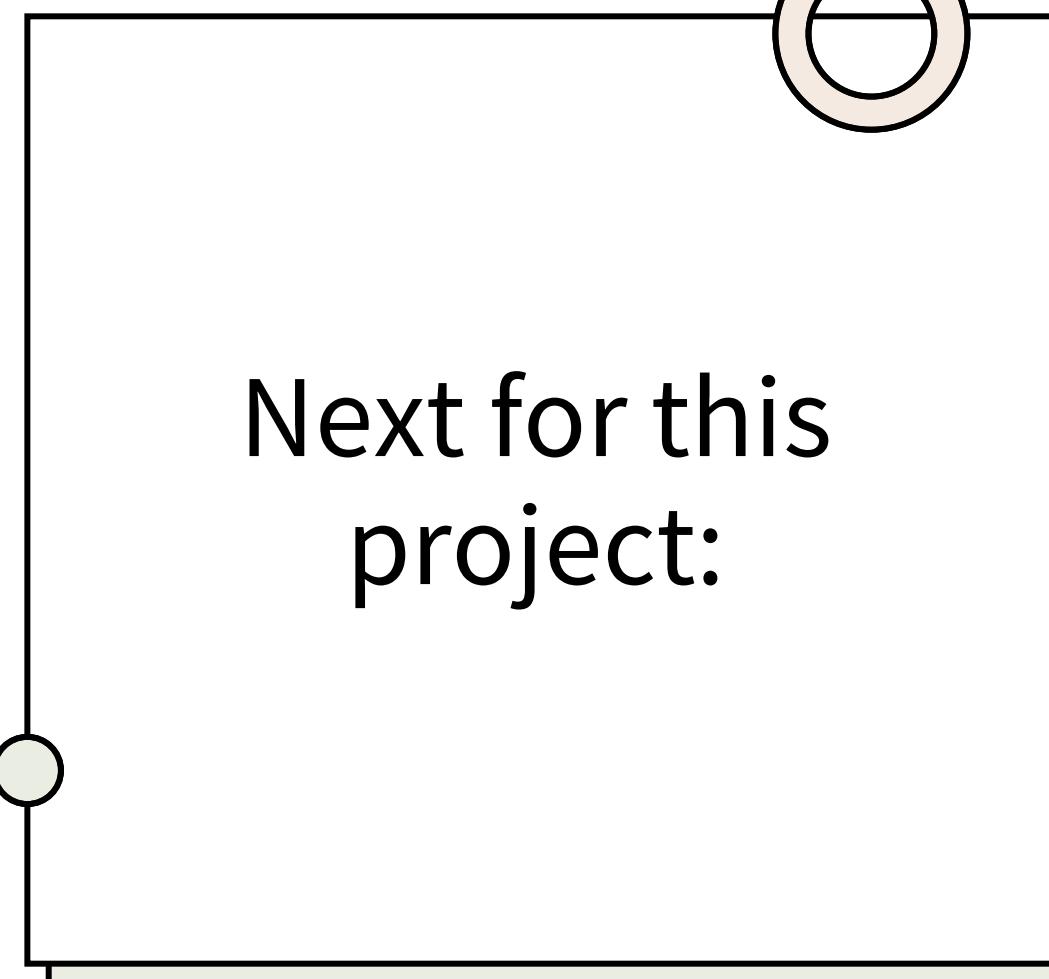

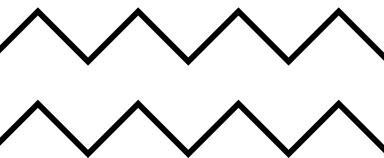

Meal List from DB,
Drag and Drop
Meals to calendar
spots. Add meal
button, adds the
meal to the DB for
future use.

WHAT I HAVE LEARNED:

**DRAG AND DROP,
MONGODB ATLAS,
EXPRESS**

Next for this
project:

- Adding a recipe page, to keep with the meal planning.
- Adding other calendar views, for people that like to plan at 2 weeks or a month.
- Adding meal labels like dinner, for a way to search for meals.
